The sixty-first annual fair of the New London County Agricultural society closed on Wednesday with the keenest and hardest racing, the horsemen said, that the fair has had in a score of years. It brought back the days of the old racing, when the horses went day and night and spread themselves into a couple of days before the winner was decided. And then the people had a real sensation when Bert Eager, the 22 year old balloonist, hurled down through the air for hundreds of feet when his parachute refused to open. He could be seen kicking and squirming as he fell, and then just as he was about to disappear beyond the trees from the sight of the crowd on the fair grounds, the big white umbrella opened up and he came down without a scratch.

Eager said after he got back to the grounds that he had just about given up hope and his thoughts were tuming toward a nice quiet spot in a cemetery. Still he kept trying to induce his parachute to spread out, but the moisture in the air seemed to have kinked the ropes and made the apparatus unmanageable. He figured he was only about 75 feet above the ground when the folds of the parachute came free. Then it spread out and stopped his downward progress with a jerk. He landed on a soft spot ground close by John H. Ford's ice houses, He came down within full sight of the East Great Plain school house, and the principal, who is Miss Maude G, Lathrop, rewarded her pupils, for an unusually becoming first day in school by letting them out a triffie ahead of closing time to see the airman as he got to the ground. Out of Sight in the Clouds. Wednesday's atmospheric conditions made the assension more spectacular than usual as the balloon was sent up shortly after 3 o'clock it faded quickly from sight in the misty haze. Only the keenest eyed could discover it after it had got up a mile and then it disappeared entirely from everyone. On the ground Prof. T. H. Flowers fired his first signal shot and then before he had waited the usual interval before the second signal, the waiting crowd could see Eager drop out of the mist like a shot. Then just at the last moment, the big white parachute opened. A moment later, the other two umbrellas, used in the first two parts of the triple drop, came down in the same place. After he got back to the grounds, the young balloonist was brought up on the stage and presented to the crowd. Few realized what he had just been through, but at the stage some of his friends had turned away as they say him falled. Straight, Lank Hair No Longer Necessary

(Guide to Beauty.)

A simple and harmless fluid, hitherto little used for the purpose, has proved so wonderfully affective in quickly turning straight hair beautifully wavy, it bids fair to become all the rage. You may be surprised to learn that this product is nothing more than plain liquid slimerine. More susprised still, when you see how prettilly it dries in the most natural-lesking curies swirts and orinkles you could wish for. It makes a fine dressing for the help, too, keeping it so soft and lustrous.

A few ounces of liquid slimerine, which can of course be found in any drug store, will keep the hair curity for weeks. It is neither sticky nor greasy but quite picasant to use. It should be applied at night with a clean tooth brush—a perfectly lovely wave and curitiness will be in evidence in the morning. Best of all, one who acquire the slimerine habit need never again resort to the barbarous curing iron.
